WHISKY 101

Problem Statement

- Too many choices available for general public to enjoy and appreciate Whisky

General Approach

- Recommend whisky by understanding the consumer's palette
- Clustering of consumer's diet to match different whisky profile

Data Source

- Using PRAW on reddit to obtain general review of whisky
- Recommendation through certified whisky ambassador

FOOTBALL 202

Problem Statement

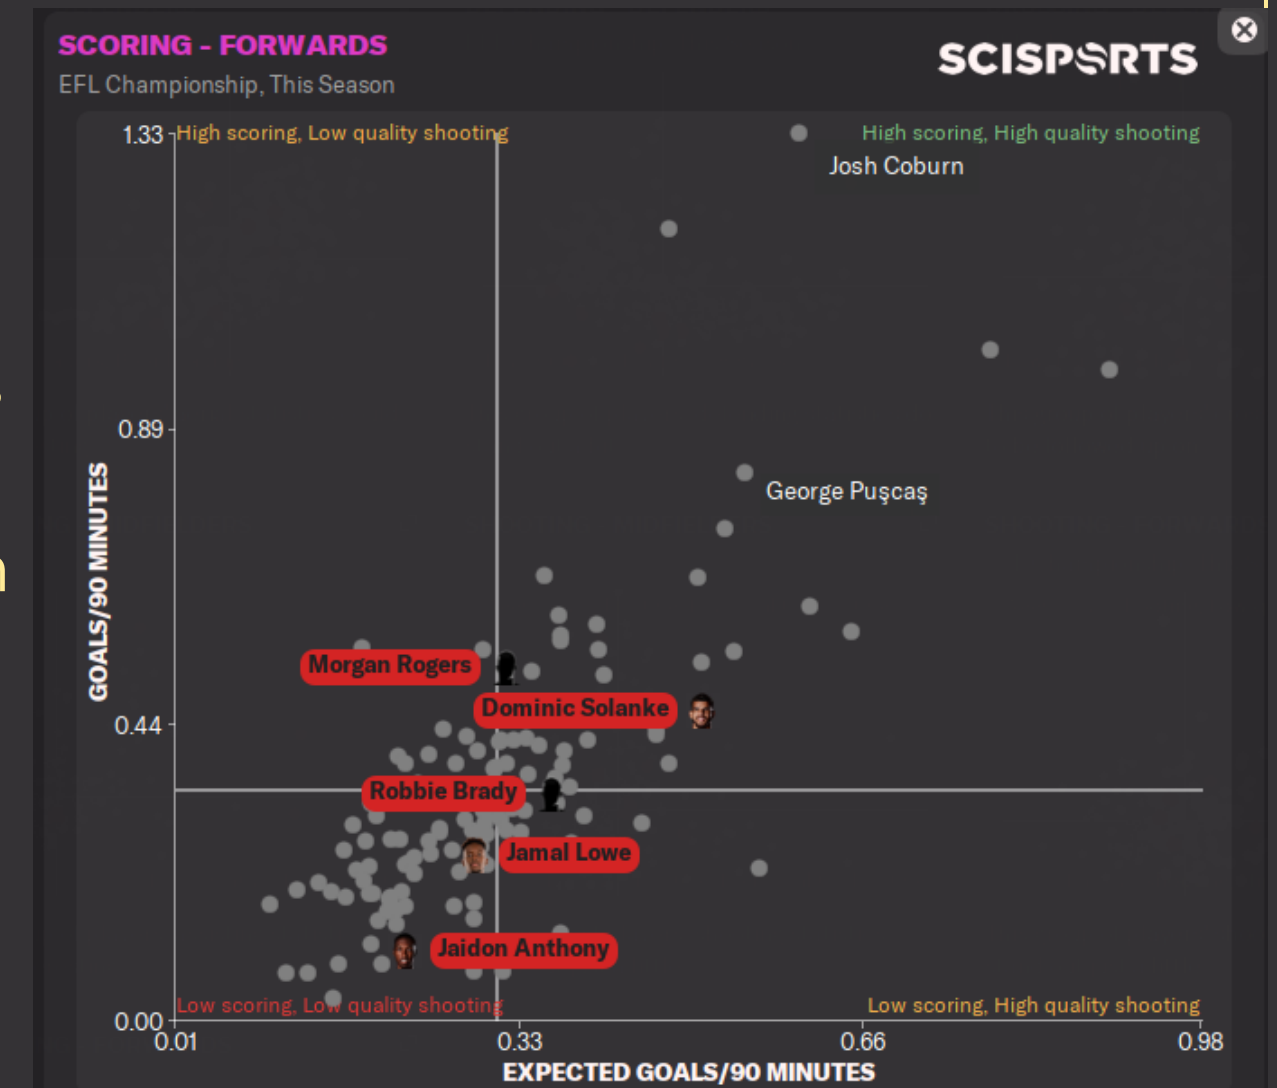

- From the time where Sir Alex Ferguson left the team, Manchester United have been overpaying in terms of salary and transfer fee

General Approach

- Recommend potential players that are undervalued in terms of tactics used by Erik ten Hag
- Base on the match performances of scouted players and match performance with ManUtd players, predict how efficient will the scouted player perform

Data Source

- <https://www.transfermarkt.com/>
- Football Manager Database

HDB 001

Problem Statement

- As covid restricted the amount of foreign workers, it led to delayed completion time of HDB and caused huge inflation of HDB prices

General Approach

- Valuation and HDB price prediction based on amenities nearby

Data Source

- HDB Web

THANK YOU!
